

satisfy the Examiner's 35 USC 112 concerns and overcome the 35 USC 103 references of record to date. The above amendments are submitted to adopt the Examiner's suggestions to more particularly point out applicant's invention, and enable the Examiner now to update his search before passing the claims for final review.

As applicant has overcome the 35 USC 112 rejection by revising the claims for the second time, they should now be entered and allowed unless the Examiner's expanded search uncovers additional references, for the reasons previously outlined in the earlier amendment responses (see in particular, applicant's Third Amendment filed April 15, 2003).

Applicant's revised Claims 12 through 22, as amended, cover an insurance verification method using all available data, whether complete, accurate, interrelated, or repetitive from three data sources: insurance companies, state motor vehicle records, and state driver's license records. This data is not pre-screened by category (previously added claim amendment). It also does not contain corresponding cross-matching interrelated data field categories for common indexing (added claim amendment). A sorting and matching program, is then employed where the databases do not have sufficient cross-indexing to be a reliable match in and of themselves.

Revised Claims 12 through 22 eliminate the need for extensive personnel screening training and insures more than sufficient data input to generate highly accurate automobile insurance verification lists. Applicant's employment of all available data without pre-screening or common indicia indexing, whether accurate or not, to provide highly accurate lists of drivers having automobile insurance is counterintuitive to the problem being solved and is not disclosed by the previous references

In summary, the rejection of Claims 12 through 22, as amended, should therefore be withdrawn. Applicant's invention and method provided the first statistically accurate uninsured motorist lists, which are reliable enough to be accessed in real time on line for field detention of uninsured motorists. It therefore meets the unexpectedly improved properties not present in the prior art under *In re Dillon*, 919 F.2d 692-93 (16 USPQ21d at 1901) to establish non-obviousness. If the foregoing revised claims are not sufficient to allow said claims, a telephonic conference is again requested with the Examiner.
